349 Fig. S1. Mean light intensity (from 300 to 700 nm) on two separate sampling dates when
 350 conditions were clear (26 Aug 2002, $N = 63$, black) and overcast (28 Jul 2002, $N = 57$, gray)
 351 (mean \pm 1 se). Measurements were taken between 1100-1500 hours.
