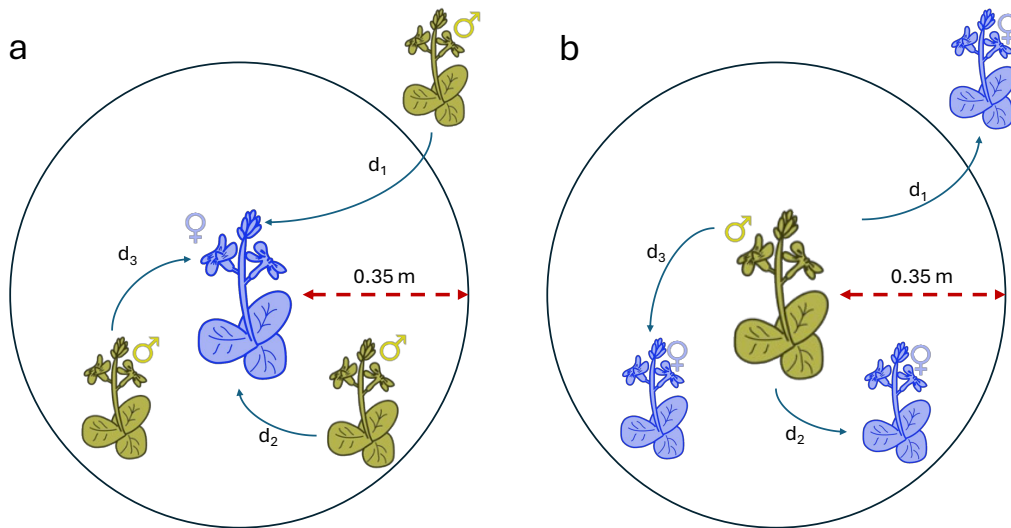

Figure S1. Schematic representation of the mean cross distance with the pollen donors (a) and mean cross distance with the pollen receptors (b). Left circle represents a focal plant as pollen receptor (in blue) surrounded by neighbouring individuals as pollen donors (in yellow), arrows illustrate the distance between the pollen receptor and its assigned pollen donors. Right circle represent a focal plant as pollen donor (in yellow) surrounded by neighbouring individuals as pollen receptors (in blue), arrows illustrate the distance between the pollen donor and its assigned pollen receptors.
